

2007-2008 BASIC HOSPITAL COVERAGE FOR RURAL COUNTIES IN MISSOURI•

The attached chart includes the current basic hospitals in Missouri, per the definition at 20 CSR 400-7.095(1)(I)(1), with the current address, city, state, zip code and county in which the facility is located. Several counties in Missouri do not have a basic hospital facility within the borders of the county. This chart includes the percentage of coverage by facilities in the county and in contiguous counties. Since this chart evaluates basic or rural counties in Missouri, the counties of Jackson, St. Louis, and St. Louis City were not included in this evaluation. These urban counties contain several facilities which are at least basic facilities and listed without percentage of coverage for contiguous counties. The evaluation used 10 enrollees per zip code, for all zip codes in Missouri, to determine the percent covered.

For Service Area Expansion requests, this will provide a list of facilities in contiguous counties and the percentage of coverage in contiguous counties for each facility. Percentages may vary depending on the actual location of enrollees when the annual Network Access Filing is completed. Due to the duplication or overlap of coverage by facilities, percentages cannot be added to achieve the 90-100% necessary for Network Adequacy compliance. **DO NOT ATTEMPT TO ADD %'s TO GET TO THE SCORE YOU NEED.** Just use this chart to get a sense of the hospitals you might need in your networks to serve specific counties.

2007-2008 BASIC HOSPITAL COVERAGE FOR RURAL COUNTIES IN MISSOURI•

The attached chart includes the current basic hospitals in Missouri, per the definition at 20 CSR 400-7.095(1)(I)(1), with the current address, city, state, zip code and county in which the facility is located. Several counties in Missouri do not have a basic hospital facility within the borders of the county. This chart includes the percentage of coverage by facilities in the county and in contiguous counties. Since this chart evaluates basic or rural counties in Missouri, the counties of Jackson, St. Louis, and St. Louis City were not included in this evaluation. These urban counties contain several facilities which are at least basic facilities and listed without percentage of coverage for contiguous counties. The evaluation used 10 enrollees per zip code, for all zip codes in Missouri, to determine the percent covered.

For Service Area Expansion requests, this will provide a list of facilities in contiguous counties and the percentage of coverage in contiguous counties for each facility. Percentages may vary depending on the actual location of enrollees when the annual Network Access Filing is completed. Due to the duplication or overlap of coverage by facilities, percentages cannot be added to achieve the 90-100% necessary for Network Adequacy compliance. **DO NOT ATTEMPT TO ADD %'s TO GET TO THE SCORE YOU NEED.** Just use this chart to get a sense of the hospitals you might need in your networks to serve specific counties.

2007-2008 BASIC HOSPITAL COVERAGE FOR RURAL COUNTIES IN MISSOURI•

The attached chart includes the current basic hospitals in Missouri, per the definition at 20 CSR 400-7.095(1)(I)(1), with the current address, city, state, zip code and county in which the facility is located. Several counties in Missouri do not have a basic hospital facility within the borders of the county. This chart includes the percentage of coverage by facilities in the county and in contiguous counties. Since this chart evaluates basic or rural counties in Missouri, the counties of Jackson, St. Louis, and St. Louis City were not included in this evaluation. These urban counties contain several facilities which are at least basic facilities and listed without percentage of coverage for contiguous counties. The evaluation used 10 enrollees per zip code, for all zip codes in Missouri, to determine the percent covered.

For Service Area Expansion requests, this will provide a list of facilities in contiguous counties and the percentage of coverage in contiguous counties for each facility. Percentages may vary depending on the actual location of enrollees when the annual Network Access Filing is completed. Due to the duplication or overlap of coverage by facilities, percentages cannot be added to achieve the 90-100% necessary for Network Adequacy compliance. **DO NOT ATTEMPT TO ADD %'s TO GET TO THE SCORE YOU NEED.** Just use this chart to get a sense of the hospitals you might need in your networks to serve specific counties.

2007-2008 BASIC HOSPITAL COVERAGE FOR RURAL COUNTIES IN MISSOURI•

The attached chart includes the current basic hospitals in Missouri, per the definition at 20 CSR 400-7.095(1)(I)(1), with the current address, city, state, zip code and county in which the facility is located. Several counties in Missouri do not have a basic hospital facility within the borders of the county. This chart includes the percentage of coverage by facilities in the county and in contiguous counties. Since this chart evaluates basic or rural counties in Missouri, the counties of Jackson, St. Louis, and St. Louis City were not included in this evaluation. These urban counties contain several facilities which are at least basic facilities and listed without percentage of coverage for contiguous counties. The evaluation used 10 enrollees per zip code, for all zip codes in Missouri, to determine the percent covered.

For Service Area Expansion requests, this will provide a list of facilities in contiguous counties and the percentage of coverage in contiguous counties for each facility. Percentages may vary depending on the actual location of enrollees when the annual Network Access Filing is completed. Due to the duplication or overlap of coverage by facilities, percentages cannot be added to achieve the 90-100% necessary for Network Adequacy compliance. **DO NOT ATTEMPT TO ADD %'s TO GET TO THE SCORE YOU NEED.** Just use this chart to get a sense of the hospitals you might need in your networks to serve specific counties.

•These percentages are based on 10 enrollees per zip code in each county and may vary depending on which zip code enrollees actually reside or work.

♦Due to the possible duplication or overlap of coverage by facilities, the percentages cannot be added to achieve the 90%-100% necessary for network adequacy in a particular county.

*Jackson County, St. Louis City and St. Louis were not included in this evaluation due to the multiple facilities in each county for enrollee access to services.
